CAB - Smoking on Aircraft

The attached memorandum fills in some of the details missing from the recent news articles on the CAB's latest effort to regulate smoking aboard aircraft.

Although I am not burdening you with the entire CAB Staff Report, you may find the three pages (2, 3 and 4) of the draft notice informative as to the belabored history of the CAB smoking regulations.

I will advise you further regarding the Industry's submission of comments on these latest proposed regulations.
