Re.: Publications by Kyerematen et al. on the biokinetics of nicotine

Dear Professor Gorrod:

During the 4th International Symposium in Munich on the Biological Oxidation of Nitrogen in Organic Molecules, we discussed recent publications on the biokinetics of nicotine with special regard to the formation of nicotine-N'-oxide in different species. Please find enclosed the copies you requested of the 2 publications by the Kyerematen group recently published on this subject.

We would like to stay in contact with you with regard to this interesting field of research and hope to meet you on future meetings.

Kind regards

Dr. H.-J. Haussmann

Dr. G. Schepers

Enclosure: 2 copies of publications by Kyerematen et al.
