SUBJECT: PRODUCT DEVELOPMENT TIMING/CORPORATE TAR REDUCTION

Attached are the September schedules for product development timing and the 1981 Corporate Tar Reduction Program.

The product development timing schedule this month incorporates revised 1981/82 development project priorities and a number of revised project timings. For that reason, timing exceptions will not be detailed this month, but will again in subsequent reports. The new priorities list is based on current product performance information, and will be updated each month to reflect priority changes due to changes in product performance. This in turn may have an impact on project timing.
