4th & Main Streets
Winston-Salem, North Carolina 27102

Dear Dr. Henley:

Enclosed is a copy of your List No. 7 with the thirty-two compounds desired indicated as usual. I did not request any of the pyrrolidine derivatives (e.g., SB32A, etc.) at this time, but we might want some later. Some pyrrolidines from list No. 4 showed growth-regulant activity. We would like to do some follow-up screening and check the patent situation before doing much further work on these.

I hope to have the screening results of list No. 4 and 5 sometime next week and will forward those to you as soon as possible.

As I mentioned to you on the phone (5-23-72) we think that it would be useful to get together soon to review the results of our agreement. Since the agreement is scheduled to expire this September, this would be a good time to reappraise the program.
