RE: New MSS Fine Paper Specifications Required

I have attached copies of new MSS tipping specifications for tipping items which are now going to be produced by the Tobacco Packaging Division (i.e., Archer), and the revisions are written in red ink across the hard copy. These are in need of immediate entry into the system. Briefly, they are:

- 003  
o 00?-4445 TP, 78X3200 ML120R WHITE, PKG/EC 30336, 37.0 GM/NP
- 002  
o 00?-4446 TP, 78X3200 ML120M WHITE, PKG/EC 30336, 37.0 GM/NP
- 005  
o 00?-5644 TP, 70X3500 SSLCP100, PKG/EC 30336, 36.5 GM, NONPERF
- 003  
o 00?-3305 TP, 70X3500 SL100CP, PKG/EC 30336, 37.0 GM, NONPERF
- 004  
o 00?-5347 TP, 54X3500 CT85, PKG/EC 30132, 34.1 GM, NONPERF

\*NOTE: In addition to changing the convertor from Ecusta to Packaging on the above tipping items, the first four have also been converted from the old 30637 to the new Ecusta 30336 base paper which reduces tipping-related defects by over 50%.

I have requested on the attached copies for these specifications to be effective on 12-18-89.

Thank you for your support in this project!

*Paul*
