Dear Donnie:

Reference: Ecusta File Code 64-80

Enclosed are the results of the referenced porosity correlations between our laboratories as follows:

Electrostatically Perforated Tipping

The values are considered to be in satisfactory agreement within this set. We have just completed a duplicate correlation on ESP, File Code 96-81, which is in good agreement with File Code 64-80.

Thank you for your continued cooperation in this work.

Sincerely,

G. S. Grose
Analytical Services Supervisor
