Dr. Herbert Levine
Department of Biostatistics
Montefiore Hospital and Medical Center
Bronx, New York

Dear Doctor Levine:

Thanks very much for your willingness to evaluate the results of my animal study. It really is necessary to keep this work in confidence at present.

I have tried to keep my description brief and, hopefully, clear.

It would be of value to know the significance of the difference between using the additive (code name "MURKOL") and not, in two respects:

- 1) The production of fibrosarcoma alone
- 2) The production of the total numbers of malignant tumors.

Very truly yours,
