D A T E	August 22, 1973
T O	Mr. M. T. Smith, Manager, Durham Branch Mr. William Nichols, Jr., Manager, Reidsville Branch
F R O M	R. S. Sprinkle, III, Coordinator - Research and Development
R E F	TAREYTON 85mm and 100mm Cigarette Production

Reference is made to my memorandum of August 10, 1973, concerning the leaf blend modification made in the above mentioned products. This memorandum requested that samples be sent to Research representing a cross section from each day's production for the first five days in which this modification was in effect.

Please continue this sampling procedure by supplying Research with ten (10) cartons of cigarettes per day until notified otherwise. Send the samples to the attention of Dr. P. H. Leake so that we may continue to monitor your production beyond the initial five-day production period.
