New York, New York 10021

CONFIDENTIAL

Title: Studies of Human Lung Carcinomas.

Objective: Bronchial squamous cell carcinoma of the lung, representing over 40% of all lung cancers is the histologic type generally believed to be associated with smoking and air pollution. The objective of this study is to investigate the possibility that squamous carcinomas release antigenic components to which humoral antibodies are formed.

Current Grant Level: \$40,000. January 1, 1974 - December 31, 1974

Projected Duration: 1 additional year

Other sources of support: None
